

Power & Light Controller PLC-C Compact

Advantages of the new doctorseyes System

- Shadow-free illumination during intra-oral and macro photography
- Evaluation of the picture while composing
- Reflections can be seen in advance, avoided and even deliberately defined
- Color temperature in approximately daylight quality
- Defined light environment result in constant results
- Fits all digital cameras, video cameras and microscopes
- Longevity of LEDs
- Very economic since LEDs consume very little energy
- Adaptable to various dental mirrors
- Chin support for defined distance and steady pictures
